

# MALAYSIA STAY & BUILD 2023

Untuk mu, Negara ku

Module One: 20 - 22 Feb

Module Two: Site Visits 6 - 8 Mar | Forum 16 - 17 Mar

## IT'S TIME TO STAY AND BUILD MALAYSIA

Low economic mobility. Lack of meaningful employment opportunities. Unaffordable housing. Weak governance structures. Institutional racism. Threatened biodiversity.

These are real problems. They are catalysts for a damaging brain drain. But they are not insurmountable.

The solutions for Malaysia must come from the current generation actively participating in building a prosperous and resilient nation. But we must act with urgency. As a citizen, employer, employee or community leader, a commitment to staying and building a better Malaysia is critical. Engagement is vital. Leaving is not the answer.

For years, the Global Institute For Tomorrow (GIFT) has facilitated the creation of actionable proposals with promising ideas to redesign society. This can be incorporated to shape the future of Malaysia. Join us for the inaugural Malaysia Stay & Build (MS&B), designed to inspire Malaysians to become active citizens with a "new vision" for Malaysia.

# FIELD PROJECT

**Revitalising  
Malaysia's Agri-Food  
Industry:  
Path to Food Security**

The project will focus on revitalising the agri-food industry towards the creation of a nation with sustainable food security. Participants will be invited to develop robust policy recommendations and practical business ideas that will help create a vibrant and self-sufficient agri-food ecosystem in Malaysia.

The project will address key issues around the nation's staple food supply, including the creation of employment opportunities along the agri-food supply chain, increasing domestic agricultural investment, and improving the efficiency of land use. Through engagement with stakeholders and project partners, participants will be guided to develop solutions to reimagine the sector, regulate the conversion of farmland, transform agri-food into a more competitive and lucrative industry, and ultimately help Malaysia become a more sustainable and self-sufficient nation.
