GIFT Global Leaders Programme (GLP)

International senior leaders will undergo rigorous classroom sessions before travelling to Singapore and Chennai, to immerse themselves in a high-impact experiential project.

The project is designed in partnership with the **World Toilet Organization**, to explore how Singapore's Hawker Centre model can be adapted to strengthen India's street food ecosystem.

Participants will develop various frameworks and solutions covering sanitation infrastructure, vendor transition strategies, operational management, affordability, digital integration, and public-private partnerships.

Jack Sim
Founder & Director, WTO | “Mr. Toilet”

Project Partner

Delivered practical sanitation solutions and hygiene improvements that have strengthened public health, dignity, and quality of life in communities worldwide.

Established the World Toilet Summit and World Toilet College as leading platforms for sanitation innovation, capacity building, and stakeholder collaboration.

Successfully championed the recognition of UN World Toilet Day and continues to influence sanitation policy and investment agendas around the world.
